**safe™**

## **SOBRsafe's next-generation Alcohol Detection Technology provides solutions for law enforcement, probation, and rehabilitation facilities, enabling trust, and empowering recovery with a human touch.**

SOBRsafe's advanced transdermal technology detects and reports (in real-time) the presence of alcohol emitted through a user's skin - no breath, blood or urine samples required. With a powerful data platform, SOBRsafe provides next generation, passive detection technology for REHAB FACILITIES, BEHAVIORAL HEALTH PROVIDERS, AND LAW ENFORCEMENT.

**About VCheck24:** In a rehabilitative capacity it entails the handing over of an additional level of personal responsibility to bridge the gap between inpatient and outpatient care.

The freedoms of outpatient rehabilitation often come with the risk of veering off course with treatment. This is where the benefits of VCheck24's continuous GPS tracking, flexible geo-zone creation, and zone triggered VChecks come in. Plus, with on-demand, scheduled, and recurring in-app messaging and polling with your client, you can remain in constant contact with them, alert them to upcoming appointments, recurring treatment sessions, and even remind them regularly when it's time to take their prescribed medication.

When a patient enters or leaves a pre-defined zone of interest (such as home, work, the gym, or treatment facility), they are prompted to check in. Multiple parties may receive a text and/or e-mail alert when the zone is entered or exited, and when that patient completes the VCheck.

In this way, VCheck24 provides a steppingstone toward increased accountability and the freedoms of outpatient rehabilitation. It provides the individual an opportunity to prove responsible decision-making while earning advancement through the rehab program.

**About SOBRsafe:** Alcohol misuse is a leading cause of preventable death, yet prevention and monitoring solutions have not kept pace with this epidemic. Legacy technologies are invasive and inefficient, unhygienic, and unconnected. There must be a better way.

Enter SOBRsafe™. Our advanced transdermal (touch-based) technology detects and instantaneously reports the presence of alcohol as emitted through a user's skin - no breath, blood or urine sample is required. With a powerful backend data platform, SOBRsafe provides next generation passive detection technology for behavioral health, judicial and consumer markets, and for licensing and integration.

SOBRsure™ is a game-changing, fitness-style wristband for advanced alcohol safety, support, and recovery.

Key features include: privacy-forward wearable alcohol detection, continuous remote monitoring, app-based reporting, GPS tracking, wrist monitor removal alerts, 3-day battery life, comfortable, adjustable band, two band sizes: 8.25" and 10.5", easy-charge dock, USB power cable.

**Empowering Your Recovery:** SOBRsure's innovative, continuous remote alcohol monitoring technology is the new compelling solution for mandated monitoring. No administered or scheduled testing... just wear it and live life.

**The Power of Monitoring:** Individuals who are monitored for five years post-treatment have a recovery rate of up to 92%, as opposed to the average five-year recovery rate of just 30%.

**Advanced Technology, Easy to Monitor:** SOBRsure's technology makes it easy for families or professionals to monitor progress. The application provides alcohol detection alerts, pinpoint location tracking, and band removal notifications.

The SOBRsafe technology is available for point-of-care screening (SOBRcheck) and continuous monitoring (SOBRsure). At TraTek, we're creating a culture of prevention and support. To learn more, e-mail [info@tratek.ca](mailto:info@tratek.ca) or call 604-820-7754 / 888-850-9691.
