**SOBRsafe's Alcohol Monitors**

**VCheck24's Smartphone Supervision With Facial Recognition.**

## Tratek Monitoring Services, known for electronic monitoring devices that improve public safety, have now introduced new high-quality alcohol detection and user compliance monitoring equipment for various rehab and justice matters.

- When used in a rehab capacity the freedoms of outpatient rehabilitation often comes with the risk of veering off course with treatment. This is where **VCheck24's** continuous GPS tracking, flexible geo-zone creation, and zone triggered video check-ins comes in. In addition, with on-demand, scheduled, and recurring in-app messaging and polling with an enrollee, agencies can remain in constant contact with them and alert them to upcoming appointments, recurring treatment sessions, and even remind them regularly when it's time to take their prescribed medication. When a patient enters or leaves any pre-defined zone of interest (such as home, work, the gym, or treatment facility), they are prompted to check in. Multiple parties may receive a text and/or e-mail alert when the zone is entered or exited, and when that patient completes the video check-in. In this way, **VCheck24** provides a steppingstone towards increased accountability and the freedoms of outpatient rehabilitation. It provides the individual an opportunity to prove responsible decision-making while earning advancement through the rehab program.
- **VCheck24's** smartphone monitoring and supervision technology provides both rehab facilities and justice officers solutions to enable user compliance with client schedules, geo-zone creation, in-app agent/client messaging, as well as automatic daily and/or weekly activity and alarm reporting.
- **VCheck24** can also be used in Step-Down programs regarding both ankle monitors and rehabilitation programs. **VCheck24** smartphone monitoring and supervision technology provides solutions to enable user compliance with rehab facilities and justice officers everywhere by and client facial recognition, video check-ins, continuous GPS tracking, customizable check-in schedules, geo-zone creation, in-app agent/client messaging, as well as auto daily and/or weekly activity and alarm reporting.
- **SOBRsafe** is next-generation alcohol detection technology today and it provides solutions for rehabilitation facilities, and/or law enforcement regarding Rehab, Family Court issues, DUI, and Bail / Probation.
- **SOBRsafe** offers continuous monitoring via a sleek, fitness-styled wristband. advanced transdermal technology detects and reports (in 8-seconds) the presence of alcohol emitted through a user's skin - no breath, blood or urine samples are required. Just wear and live life.
- **SOBRcheck** is a point of care alcohol monitor that also verifies a users identification by just the touch of a finger in approximately 8 to 10-seconds. Ideal for client check-in, medication stations, and staff safety.
- **SOBRcheck** is up to 4-times more efficient than a standard breathalyzer check-in process. In addition, the technology is much faster and more sanitary than breathalyzers as well.

## With SOBRsafe, VCheck24, and TraTek You Get Quality Products and Great Service
