

The Next Generation of GPS Tracking

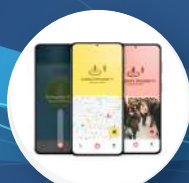

Wherever they go, you know where they are

A discrete trio, SuperCom's GPS Offender Tracking combines the PureTag bracelet with PureTrack smartphone location capabilities and PureBeacon Bluetooth technologies. Using today's latest and proven GPS, cellular and Wi-Fi communication lines, SuperCom's GPS Offender Tracking solution updates on every movement and restriction deviation.

Signaling every step and offering comprehensive assembly, the PureTag ankle bracelet is comfortably-smart, sturdy and waterproof. Carrying customized smartphones that continually communicate with the ankle bracelet, the GPS Tracking Solution ensures offenders are closely monitored while they continue their daily activities. Setup indoors, PureBeacon verifies the offender's presence via near-field Bluetooth technology removing any reliance on GPS for ensuring location compliance.

Monitoring Them Both Indoors And Out

Schedules with enforced Biometric authentication

GPS Offender Tracking watches every movement and enforces scheduled and spontaneous biometric authentication. Alerting on tampering and out of zone activities, GPS Offender Tracking gives Law Enforcement the knowledge they need when they need it.

PureTag BLE Bracelet

- Slim, lightweight, ergonomic and hypoallergenic
- Waterproof and dustproof
- Easy to assemble and fit
- 2 years battery
- Advanced tampering detection
- Encrypted RF signal

PureMonitor Software

- Mobile-enabled and browser agnostic
- Comprehensive and easy to learn interface
- Clear permitted and prohibited zones
- Calendar-based detainee schedules with planned and spontaneous requests for authentication
- Flexible alerting, reporting and analytics

PureBeacon

- 2 years battery
- Encrypted RF signal
- Proximity, motion and case tamper detection
- Lightweight, waterproof, and dustproof

PureTrack Smartphone

- GNSS, LBS and Wi-Fi location tracking
- LTE and 5G cellular communication
- Encrypted RF tethering
- Two-way communication via video call, voice call and chat
- Displays program schedule, zones and current status
- Configurable GPS point frequency and data transmission intervals
- Extended battery life
