

# ADVANCED SMARTPHONE SUPERVISION APP

Supervision Tool + Rehabilitation Tool  
= Program Success

"CHECK IN NOW"

## ABOUT US

Smartphone monitoring for criminal justice supervision is not a new concept. Various programs have been available since at least 2015. Slow adoption by the market can be attributed to not enough clients owning smartphones, inadequate smartphone monitoring and tracking features, and complicated systems that are not intuitive and require hours of training.

Changing rapidly are the numbers of clients who own smartphones, making this type of monitoring a very viable, cost effective solution for effectively monitoring the compliance of a high volume of lower risk individuals. What hasn't changed much are the smartphone monitoring products available for the criminal justice market, until now...

The patented **VCheck24** was developed as a result of hundreds of hours of market and product research, with the end users in mind. The very latest in advanced smartphone supervision and monitoring, VCheck24 brings a highly flexible, feature rich, yet user-friendly and intuitive system into the hands of criminal justice officers and supervisors everywhere.

## VCheck24 is ... Monitoring Made Easy

- ✓ Instant alerts & automated reports
- ✓ Data-rich dashboard

## Testimonials

"My all time favorite feature is the real time tracking. I led our bailiff to the 5th house on the north side of the street and that is where he found the defendant and now he is sold on it. I love it for that purpose."

- Rebecca E. / Probation Officer / Midland County Drug Court

"I offer a lot of services to the counties that I work (SCRAM, GPS, PAM, ignition interlock, drug patches, hair testing, UA's) but I haven't been as excited about a product as I am yours."
